

Improving land-use governance and management

Improving land-use governance and management to Address the Causes of Forest Loss and Degradation and the Increase of Carbon Stocks in Honduras and Peru

Implementation period

23 months

January 2019 - December 2020

Countries

Honduras

Peru

EU grant amount

€ 809,446

Overall project amount

€ 1' 011,808

OBJETIVE

Contributed to sustainable and resilient development in the face of climate change through successful experiences that generate benefits to the people of Honduras and Peru, such as: Reducing Emissions from Deforestation and Forest Degradation, Forest Landscape Restoration, Law Enforcement, Forest Governance and Trade.

PILOT SITES

Honduras: Cuyamel sub-basin, Near the Patuca National Park, connected to the Mesoamerican Biological Corridor and Sico-Paulaya valley, Near the Río Plátano biosphere reserve and the Sierra Rio Tinto National Park.
Peru: Alto Huayabama sub-basin, Near the Rio Abiseo National Park.

BENEFICIARIES

730 people in Peru and Honduras (including representatives from local organizations, families and the public sector)

ECOSYSTEMS

Honduras: Subtropical rainforest that includes the presence of two important areas of biological interest
Peru: Tropical montane forest and tropical rainforest

MAP - PROJECT INTERVENTION AREAS

Mapa de Ubicación del Proyecto
Valle de Sico Paulaya en Iriona Colon, Honduras

“We now have tools to improve our agroforestry
farm, which will help our food security; it is
something special in these pandemic times.”

Adán Bardales, farmer from Jardines de la Sierra Municipality of Iriona - Honduras

FIRST RESULTS

1

54 days of workshops were implemented with 48 local organizations in more than 35 communities with representatives from the public sector in both countries
Topics: REDD global forestry initiatives (conservation), FLEGT (legal trade), FLR (restoration), business management and product marketing

2

Sustainable management of more than 12,000 hectares of land was achieved in Honduras and Peru to facilitate the commercialization of environmentally friendly products

3

The project contributed to the reforestation and restoration of 45 hectares of landscapes affected by deforestation by sowing agroforestry systems in both countries.

EXCHANGE BETWEEN COUNTRIES

Exchange of knowledge and experiences in deforestation, use of forest resources and sustainability
